

HM Young Offender Institution

HMYOI Eastwood Park: Mary Carpenter Unit

Summary of questionnaires and interviews:
Children and young people's self-reported perceptions

8 August 2012

Introduction

HM Inspectorate of Prisons has conducted surveys of children and young people (aged 15–18) held in prison custody, in collaboration with the Youth Justice Board (YJB), since 2001. As part of a service level agreement (SLA) between HM Inspectorate of Prisons and the YJB, each establishment holding children and young people is now surveyed on an annual basis. The objective of the survey is to give young people the chance to comment on their treatment and conditions in custody, as part of the evidence base for HM Inspectorate of Prisons and the YJB.

This summary provides young people's self-reported experiences and perceptions within HMYOI Eastwood Park: Mary Carpenter Unit. It includes a description of the survey methodology, a description of how the data has been analysed and the survey results.

In addition to these stand-alone summaries, the data from all surveys conducted each year is also collated and presented in a report which is produced annually. This is a detailed report that includes a year-on-year comparison of survey data, a breakdown across establishments and diversity analyses.

As well as being published within this stand-alone summary and in the annual report, the survey data collected was used for an inspection. During inspections, findings from the survey are triangulated with inspectors' observations, discussions with young people and staff and documentation held in the establishment. The inspection report (which can be found at www.justice.gov.uk/about/hmi-prisons) provides a triangulated assessment of how the establishment is performing against the Inspectorate of Prisons' inspection criteria 'Expectations'. These survey results are also included within the inspection report appendices.

Survey methodology

A voluntary, confidential and anonymous survey of the population of children and young people (15–18 years) was carried out by HM Inspectorate of Prisons.

Selecting the sample

At the time of the survey on 8 August 2012, the population of young people at HMYOI Eastwood Park: Mary Carpenter Unit was six. All young people in the unit were offered a questionnaire.

Refusals are noted and no attempts are made to replace them. No young people refused.

Interviews are carried out with any respondents with literacy difficulties. In total, no respondents were interviewed.

Methodology

Every attempt was made to distribute the questionnaires to each respondent on an individual basis. This gave researchers an opportunity to explain the independence of the Inspectorate and the purpose of the questionnaire, as well as to answer questions.

All completed questionnaires were confidential – only members of the Inspectorate saw them. In order to ensure confidentiality, respondents were asked to do one of the following:

- have their questionnaire ready to hand back to a member of the research team at a specified time
- seal the questionnaire in the envelope provided and hand it to a member of staff, if they were agreeable, or
- seal the questionnaire in the envelope provided and leave it in their room for collection.

Respondents were not asked to put their names on their questionnaire, although their responses could be identified back to them in line with child protection requirements.

Response rates

In total, six respondents completed and returned their questionnaires. This represented 100% of children and young people in the establishment at the time. The response rate from the sample was 100%.

Summary

In addition, a summary of the survey results has been included, which shows a breakdown of responses for each question. Percentages have been rounded and therefore may not add up to 100%.

No questions have been filtered within the summary so all percentages refer to responses from the entire sample. The percentages to certain responses within the summary, for example 'not sentenced' options across questions, may differ slightly. This is due to different response rates across questions, meaning that the percentages have been calculated out of different totals (all missing data is excluded). The actual numbers will match up as the data is cleaned to be consistent.

Percentages shown in the summary may differ by 1% or 2% from that shown in the comparison data as the comparator data has been weighted for comparison purposes.
