About this review

In October 2010, the Government announced that the central funding provided to the police service would reduce by 20% in the four years between March 2011 and March 2015.

Her Majesty’s Inspectorate of Constabulary (HMIC) carried out an inspection of all 43 police forces in England and Wales in Spring 2011, to see how they were planning to meet this financial challenge. When the results were published in July 2011 (search for ‘Valuing the Police’ on www.hmic.gov.uk), we committed to returning one year later to report on progress, and to assess whether there had been any impact on the service provided to the public.

A thematic report, Policing in Austerity: One year on, brings together the findings from all 43 forces and looks at the picture in England and Wales. We found that, across England and Wales:

1. Forces have risen to the financial challenge, balanced the books and largely maintained the service they provided to the public in year one;

2. Their plans show that over the whole spending review period (i.e. until March 2015), they are working to protect, although not preserve, frontline services;

3. As there are significant variations between force plans and performance, HMIC has some concerns about whether all forces can sustain this position;

4. Forces should ensure the changes they are making now transform efficiency and will provide a strong enough foundation to face future spending reviews.

This report summarises the findings for Merseyside Police, and is based on data provided by the force in February 2012.¹

HMIC will continue to monitor the progress made by the force, and to publish the results on our website (www.hmic.gov.uk).

¹ Figures are rounded (financial figures to the nearest million and workforce figures to the nearest 10) and financial figures are in cash prices.
Summary

The challenge for police forces and police authorities isn’t just to balance the books, but to transform the way they deliver policing and make it more efficient, so that the public can continue to receive improving services.

Merseyside Police is a large force compared to the rest of England and Wales. The force has put in place comprehensive measures to manage the reductions in its budget. Merseyside was one of seven forces given extra scrutiny by HMIC in order that the savings plans could be better understood and the force could explain in greater detail how it will achieve these savings within the timescale required. Although plans are still at an early stage it is reassuring that the financial strategy has been further developed to deliver all savings required by March 2015.

The force has reviewed many of its key functions and departments which has brought about a reduction in the number of police officers and police staff. The force is aiming to become more efficient and make better use of its staff without having any noticeable difference in the service received by the people of Merseyside. It continues to have neighbourhood policing at its heart and provide a local service to its communities across the six divisions.

Merseyside is a key member of the North West collaboration partnership. This comprises the five North West Region police forces and North Wales Police working together to identify opportunities to provide policing more efficiently at a regional level. The partnership has plans in place which put them on track to deliver savings by 2015 by providing some services together without the public noticing any difference in the service they receive in their community. Examples of these areas of policing include motorway patrol, air support, learning and development, and provision of forensic services. Outside this regional arrangement Merseyside, Cheshire, North Wales and South Yorkshire have confirmed participation in an IT programme.

Because of the changes it is making Merseyside Police will be able to not only balance the books but increase the proportion of its workforce in frontline crime fighting roles. The force plans to have 76% of its workforce in frontline roles by 2015, which is higher than most other forces. The proportion of police officers on the front line will increase over the same period from 85% to 91%, resulting in a proportion that is again higher than the national figure.
The force continues to drive down crime and has achieved a reduction in crime broadly in line with the average rate of overall crime reduction between December 2010 and December 2011. 88% of victims in Merseyside are satisfied with the overall service provided by the force, which is higher than England and Wales as a whole.

The following sections of this report explore: money (how much Merseyside Police needs to save and its progress in achieving this); people (its planned changes to the number and type of its workforce and the effect of this on the front line); and the impact on services to the public. We have looked at these areas because they are important in helping you to understand how your force is making savings, and how it continues to improve the services you receive.
Money – meeting the savings

What is the financial challenge in Merseyside Police?

£61 million – the amount Merseyside Police will need to save between 2011 and 2015 (based on the force’s calculations). There are 17 forces in England and Wales with larger savings to make (as a proportion of their budget).

By Spring 2012, Merseyside had developed plans which outlined how it will achieve £61m (100%) of its savings requirement.

Merseyside Police’s four-year plan is based on the force saving £20m by March 2012 (i.e. in the first year of the budget reductions). The force reported that it had already saved £18m by December 2011.

As well as funding from the Government, forces also receive money from local council tax. The police authority has decided to increase by 3% the amount of money you pay for policing from your council tax in 2012/13. This is one of 22 forces in England and Wales where it will increase.

Within the force’s plans are a number of assumptions on future costs, including pay increases, rate of inflation and the level of funding it will receive from council tax. If these costs change this may impact on the amount of savings the force has to find.

Forces will continue to develop the detail of their plans between now and 2015. The amount of savings they need to find may therefore go up or down as they revise their assumptions and update their plans.
People – reconfiguring the workforce

What is the impact on the workforce?

1,070 – the number of posts the force plans to cut by 2015. 550 of these will be police officer posts. This is a 12% reduction in police officer posts, compared with a 10% reduction across England and Wales.

Because 81% of police budgets (on average) is spent on staff costs, it is not surprising that forces across England and Wales are planning to achieve most of their savings by reducing the number of police officers, police community support officers (PCSOs) and police staff they employ.

According to data provided by the force in February 2012, Merseyside Police is planning to make the following changes to its workforce between March 2010 and March 2015. By March 2012 the force plans to have achieved 38% of the required reduction of its workforce. (We use March 2010 as our starting point here because many forces started to reduce their workforce in the year before the funding cut was implemented, anticipating that they would have to make savings later on.)

Notes:
2010 is a snapshot of the number of people in post, whereas the 2015 data is projected number of posts. All workforce figures are rounded to the nearest 10; columns may therefore not add up. In the workforce baseline data (March 2010), an ‘Other’ function is included within the non front line. This is made up of staff absent from duty due to maternity / paternity leave, career break, full time education or suspension, and those on long-term leave (sickness, compassionate, special and unpaid leave). In March 2010 the ‘Other’ function made up 1 percent of the total workforce across England and Wales. The projected data for March 2015 was provided by forces, and forces have budgeted for this in different ways. As a result there will be some variability when used for comparisons. Police staff actual figures for 2010 include Designated Officers. Designated Officers are not included in 2015 estimated figures.
What is the effect on the front line?

HMIC defines the people who work on the police front line as: “those who are in everyday contact with the public and who directly intervene to keep people safe and enforce the law.”

76% – the proportion of the total workforce (i.e. officers, PCSOs and staff) Merseyside Police estimates will be working on the front line by 2015.

91% – the proportion of police officers specifically the force estimates will be working on the front line by 2015, up by six percentage points from 2010.

Number and proportion of officers, PCSOs and staff in frontline roles

The number of officers, PCSOs and staff (i.e. the force's total workforce) working on the front line will drop from 5,070 in March 2010 to an estimated 4,700 by March 2015.

Based on these figures, the proportion of Merseyside Police’s total workforce allocated to frontline roles will increase from 70% to 76%. This compares with an overall increase across England and Wales from 67% to 74%.

The following chart shows the change in the workforce frontline profile for Merseyside.
Number and proportion of police officers in frontline roles

Looking specifically at police officers: the number of officers working on the front line will drop from 3,830 in March 2010 to an estimated 3,610 by March 2015. The number working in non-frontline roles will also drop (from 680 to 360).

Based on these figures, the proportion of Merseyside police officers allocated to frontline roles will increase by six percentage points to 91%, as the following chart shows. This is higher than the figure for England and Wales, which is 89%.
Public – reviewing the services you receive

What proportion of police officers and police community support officers are visible and available to the public?

61% – the proportion of police officers and PCSOs which Merseyside allocates to visible roles (such as officers who respond to 999 calls, deal with serious road traffic accidents or patrol in neighbourhoods). This is greater than the England and Wales figure.

HMIC defines ‘visible’ as police employees who wear uniform and mainly work in public. ‘Available’ means police officers and PCSOs who are actually ready for duty (i.e. as opposed to being on a training course, attending court, off shift, on leave or sick, etc).

It is important to note that the work done by those in visible roles represents only a part of the policing picture. Chief constables need to allocate resources to many other functions in order to protect the public, such as counter terrorism, serious and organised crime and child protection (to name just three).

Research has shown that people who see the police at work in uniform at least once a week are more likely to have confidence in their local force (see our 2011 report Demanding Times, available from www.hmic.gov.uk).

HMIC recently looked at whether Merseyside has police officers available when they are most likely to be needed, a repeat of a survey which we last carried out in 2010. This showed that there was a decrease in the proportion of police officers and PCSOs available in visible roles at key times.

How is the way you can access policing services changing?

Forces are exploring different ways in which the public can access policing services. They are making more use of the internet and social media to communicate with people and reviewing the number of face-to-face access points they need.

By 2015 Merseyside plans to reduce the number of front counters by 22. The force retains over 200 access points (such as libraries, shops, community centres and local authority buildings) where you will be able to physically access policing services, and plans to increase this by one compared to 2010.
Has there been any change in crime levels over the last year?

2% – the reduction in recorded crime levels overall in Merseyside between years ending December 2010 and December 2011 (compared with a 3% fall across England and Wales).

The first job of the police is to reduce crime and keep the peace; and in 2010 the Home Secretary Theresa May stated that she expects forces and authorities to make financial cuts while still reducing crime, and without impacting on the front line.

Based on the number of crimes per 1,000 people recorded in the 12 months to December 2011, the force came 32nd out of 42 forces (where first equals lowest crime rate).

The table below shows how rates of crime changed in twelve months to December 2011. (ASB is not included because data is not available for the same time period; however, HMIC has examined how this problem is tackled in Merseyside in a separate report, which is available on our website.)

*This category includes all crime where there is a direct victim – either an individual, a group, or an organisation.

We have chosen these types of crime to give an indication of the nature of offending in Merseyside. For information on the frequency of other kinds of crimes in your area, go to [www.hmic.gov.uk/crime-and-policing-comparator](http://www.hmic.gov.uk/crime-and-policing-comparator) where you will find more detailed information. You will also find links to the force’s own website, where it publishes the latest crime figures.

---

2 City of London is not included.
Does the force’s own survey work show any change in public satisfaction with the service they provide?

As forces reconfigure their resources to meet the budget challenge it is important that they understand the impact on service delivery. One way of measuring whether this is changing is by tracking how satisfied the public are with the overall service they receive when they seek police assistance.

The overall victim satisfaction for Merseyside is 88%, which is greater than the rate for England and Wales as a whole.3

3 This is a statistically significant difference.
