

Leaders and managers should provide tutors and instructors with high-quality staff development that helps them to improve their questioning techniques and the quality of their feedback to prisoners. (3.30)

Achieved

Prison leaders should ensure that general appointments do not prevent prisoners from attending education, skills and work activities. (3.39)

Not achieved

Rehabilitation and release planning

Prisoners are supported to maintain and develop relationships with their family and friends. Prisoners are helped to reduce their likelihood of reoffending and their risk of harm is managed effectively. Prisoners are prepared for their release back into the community.

At the last inspection in 2019, children and families work was excellent. Strategic management of reducing reoffending had improved. OASys was generally well managed. High-risk offenders were appropriately managed by probation offender supervisors and contact between offender supervisors and prisoners was reasonably good. Re-categorisation was managed well. Too many eligible prisoners were not released on their home detention curfew date. There were weaknesses in public protection work. There was an appropriate range of interventions and the well-being unit was an example of good practice. Work to prepare prisoners for release was excellent.

Outcomes for prisoners were good against this healthy prison test.

Key recommendation

Effective arrangements should be made to identify, record and monitor prisoners who pose the greatest risk in preparation for their release. (S43)

Not achieved

Recommendation

There should be a clear escalation process with community probation offices to ensure that outstanding OASys assessments which are the responsibility of community offices are completed in a timely manner. (4.20)

Achieved

Appendix I About our inspections and reports

Her Majesty's Inspectorate of Prisons is an independent, statutory organisation which reports on the treatment and conditions of those detained in prisons, young offender institutions, secure training centres, immigration detention facilities, police and court custody and military detention.

All inspections carried out by HM Inspectorate of Prisons contribute to the UK's response to its international obligations under the Optional Protocol to the UN Convention against Torture and other Cruel, Inhuman or Degrading Treatment or Punishment (OPCAT). OPCAT requires that all places of detention are visited regularly by independent bodies – known as the National Preventive Mechanism (NPM) – which monitor the treatment of and conditions for detainees. HM Inspectorate of Prisons is one of several bodies making up the NPM in the UK.

All Inspectorate of Prisons reports carry a summary of the conditions and treatment of prisoners, based on the four tests of a healthy prison that were first introduced in this Inspectorate's thematic review *Suicide is everyone's concern*, published in 1999. For men's prisons the tests are:

Safety

Prisoners, particularly the most vulnerable, are held safely.

Respect

Prisoners are treated with respect for their human dignity.

Purposeful activity

Prisoners are able, and expected, to engage in activity that is likely to benefit them.

Rehabilitation and release planning

Prisoners are supported to maintain and develop relationships with their family and friends. Prisoners are helped to reduce their likelihood of reoffending and their risk of harm is managed effectively. Prisoners are prepared for their release into the community.

Under each test, we make an assessment of outcomes for prisoners and therefore of the establishment's overall performance against the test. There are four possible judgements: in some cases, this performance will be affected by matters outside the establishment's direct control, which need to be addressed by Her Majesty's Prison and Probation Service (HMPPS).

Outcomes for prisoners are good.

There is no evidence that outcomes for prisoners are being adversely affected in any significant areas.

Outcomes for prisoners are reasonably good.

There is evidence of adverse outcomes for prisoners in only a small number of areas. For the majority, there are no significant concerns. Procedures to safeguard outcomes are in place.

from the inspection. Section 8 lists the recommendations from the previous full inspection (and scrutiny visit where relevant), and our assessment of whether they have been achieved.

Findings from the survey of prisoners and a detailed description of the survey methodology can be found on our website (see Further resources). Please note that we only refer to comparisons with other comparable establishments or previous inspections when these are statistically significant. The significance level is set at 0.01, which means that there is only a 1% chance that the difference in results is due to chance.

Inspection team

This inspection was carried out by:

Martin Lomas	Deputy chief inspector
Deborah Butler	Team leader
David Owens	Inspector
Ian Dickens	Inspector
Lindsay Jones	Inspector
Angela Johnson	Inspector
Donna Ward	Inspector
Jed Waghorn	Researcher
Charlotte Betts	Researcher
Emma King	Researcher
Isabella Raucci	Researcher
Tania Osborne	Lead health and social care inspector
Shaun Thomson	Health and social care inspector
Noor Mohamed	Pharmacist
Dee Angwin	Care Quality Commission inspector
Joanne White	Care Quality Commission inspector
Sheila Willis	Ofsted inspector
Jai Sharda	Ofsted inspector
Mary Devane	Ofsted inspector
Malcolm Fraser	Ofsted inspector
Liz Calderbank	Offender management inspector

Appendix II Glossary

We try to make our reports as clear as possible, and this short glossary should help to explain some of the specialist terms you may find. If you need an explanation of any other terms, please see the longer glossary, available on our website at: <http://www.justiceinspectorates.gov.uk/hmiprison/about-our-inspections/>

Achieve North West Connect

A social inclusion project that targets offenders with multiple barriers to employment, such as accommodation, substance misuse and issues with mental/physical health.

Care Quality Commission (CQC)

CQC is the independent regulator of health and adult social care in England. It monitors, inspects and regulates services to make sure they meet fundamental standards of quality and safety. For information on CQC's standards of care and the action it takes to improve services, please visit: <http://www.cqc.org.uk>

Certified normal accommodation (CNA) and operational capacity

Baseline CNA is the sum total of all certified accommodation in an establishment except cells in segregation units, health care cells or rooms that are not routinely used to accommodate long stay patients. In-use CNA is baseline CNA less those places not available for immediate use, such as damaged cells, cells affected by building works, and cells taken out of use due to staff shortages. Operational capacity is the total number of prisoners that an establishment can hold without serious risk to good order, security and the proper running of the planned regime.

Challenge, support and intervention plan (CSIP)

Used by all adult prisons to manage those prisoners who are violent or pose a heightened risk of being violent. These prisoners are managed and supported on a plan with individualised targets and regular reviews. Not everyone who is violent is case managed on CSIP. Some prisons also use the CSIP framework to support victims of violence.

Change Grow Live

Change Grow Live is a voluntary sector organisation specialising in substance misuse and criminal justice intervention projects in England and Wales.

Key worker scheme

The key worker scheme operates across the closed male estate and is one element of the Offender Management in Custody (OMiC) model. All prison officers have a caseload of around six prisoners. The aim is to enable staff to develop constructive, motivational relationships with prisoners, which can support and encourage them to work towards positive rehabilitative goals.

Kiosks

Communal electronic information touchscreens enabling prisoners to access services at the prison including selecting their daily meals, ordering items they

are allowed to buy and making applications. Kiosks are also used to communicate and share information with prisoners and conduct surveys.

Leader

In this report the term 'leader' refers to anyone with leadership or management responsibility in the prison system. We will direct our narrative at the level of leadership which has the most capacity to influence a particular outcome.

Offender management in custody (OMiC)

The Offender Management in Custody (OMiC) model, being rolled out across the closed male prison estate, entails prison officers undertaking key work sessions with prisoners (implemented during 2018–19) and case management, which established the role of the prison offender manager (POM) from 1 October 2019. On 31 March 2021, a specific OMiC model for male open prisons, which does not include key work, was rolled out.

Partners of Prisoners (POPs)

POPs provide information and support for offenders' families from the point of arrest through to release and beyond.

Protected characteristics

The grounds upon which discrimination is unlawful (Equality and Human Rights Commission, 2010).

Protection of adults at risk

Safeguarding duties apply to an adult who:

- has needs for care and support (whether or not the local authority is meeting any of those needs); and
- is experiencing, or is at risk of, abuse or neglect; and
- as a result of those care and support needs is unable to protect themselves from either the risk of, or the experience of, abuse and neglect (Care Act 2014).

Secure video calls

A system commissioned by HM Prison and Probation Service (HMPPS) that requires users to download an app to their phone or computer. Before a visit can be booked, users must upload valid ID.

Shannon Trust

Provides peer-mentored reading plan resources and training to prisons

Social care package

A level of personal care to address needs identified following a social needs assessment undertaken by the local authority (i.e. assistance with washing, bathing, toileting, activities of daily living etc, but not medical care).

Time out of cell

Time out of cell, in addition to formal 'purposeful activity', includes any time prisoners are out of their cells to associate or use communal facilities to take showers or make telephone calls.

How the regulation was not being met:

The registered provider had not done all that was reasonably practicable to mitigate risks to the health and safety of service users receiving care and treatment. In particular:

Secondary dispensing was occurring in the in-patient unit where one nurse was observed to be “potting up” medicines and delivering them door-to-door.

This was in breach of regulation 12(1)(2) of the Health and Social Care Act 2008 (Regulated Activities) Regulations 2014

Appendix IV Further resources

Some further resources that should be read alongside this report are published on the HMI Prisons website (they also appear in the printed reports distributed to the prison). For this report, these are:

Prison population profile

We request a population profile from each prison as part of the information we gather during our inspection. We have published this breakdown on our website.

Prisoner survey methodology and results

A representative survey of prisoners is carried out at the start of every inspection, the results of which contribute to the evidence base for the inspection. A document with information about the methodology and the survey, and comparator documents showing the results of the survey, are published alongside the report on our website.

Prison staff survey

Prison staff are invited to complete a staff survey. The results are published alongside the report on our website.
