Staff survey methodology

A survey of staff is carried out at the start of every inspection, the results of which contribute to the evidence base for the inspection.

HMI Prisons developed an online questionnaire consisting of structured questions about their experiences at the IRC. There are also fifteen open questions which allow staff to expand on their experiences and tell inspectors anything else they think is important. These comments are not published or shared with the establishment.

Distribution

HMI Prisons researchers provide a link to the survey embedded in a covering email. The covering email explains the purpose of the survey, that participation is voluntary and gives assurances about confidentiality and anonymity, enabling staff to give their informed consent to participate. This email is sent to all staff working at the establishment by an HMI Prisons researcher.

Distribution

The survey was sent to 224 email addresses at Derwentside IRC. Staff were given seven days to complete the survey. We received a total of 41 completed questionnaires.

We cannot be sure that every member of staff working at the establishment received the email. Furthermore, because the online survey is set up to enable multiple responses from a single device (to facilitate participation by those who share computers) it is possible that individuals may have completed the questionnaire more than once. It is therefore not possible to provide an accurate response rate.

Distribution

The full survey results for staff at Derwentside IRC provide a breakdown of responses for only the structured questions. Percentages have been rounded and therefore may not add up to 100%.
